SUMMARY

Full-Stack Software Engineer with hands-on experience building production-grade web applications using React.js, Next.js, TypeScript, and Node.js. Completed a frontend developer internship at PW Skills, developing responsive web interfaces, optimizing performance, and integrating REST APIs. Built and deployed three SaaS products with 100+ active users, integrating AI/LLM pipelines, Stripe billing, and real-time systems.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Java, Python

Frontend Web Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, Firebase, Supabase

Tools & Platforms: Git, GitHub, VS Code, NPM, Postman, Vercel

Generative AI & Automation: LLMs, NLP, RAG, n8n, Vector Databases, AI Agents, Gemini API

Dev Tools & Practices: System Design, GitHub Actions, CI/CD, Unit Testing

EXPERIENCE

Frontend Developer Intern

November 2025 – January 2026

PW Skills (Remote)

- Engineered learning dashboard interfaces using Next.js and Tailwind CSS, boosting active user engagement by 15%.
- Optimized client-side rendering and asset delivery, cutting page load times by 35% and improving performance.
- Connected backend REST APIs with React state management to save user data and track student course progress.
- Debugged 30+ cross-browser compatibility bugs, ensuring consistent layout rendering across mobile devices.

PROJECTS

Spectr

tryspectr.vercel.app

- Developed a privacy-first web analytics platform with a premium dark dashboard and one-line script integration.
- Implemented real-time SSE visitor tracking and cookie-less telemetry for GDPR-compliant data analysis.
- Created a reusable Prisma/PostgreSQL query layer, removing duplicate database code across 9 API routes.
- Integrated Next.js 15, TypeScript, and NextAuth to manage secure sessions across 10+ active domains.

Vartaa: Multilingual Team Chat Platform

vartaa.vercel.app

- Developed a real-time AI-powered team chat application that translates messages across 22 different Indian languages.
- Integrated Gemini and Sarvam AI to create automatic message summaries, task lists, and live translations.
- Built smart AI replies and text-to-speech voice notes to make chatting in regional languages easier for users.
- Developed using Next.js, TypeScript, Tailwind CSS, and Convex WebSockets with Clerk for user authentication.

ShortIQ

short-iq.vercel.app

- Built ShortIQ, an AI-powered automated faceless video generation and social publishing platform.
- Integrated Creatomate & Inngest for background video rendering pipelines and high-performance automated processing.
- Implemented direct social publishing to YouTube and TikTok, streamlining end-to-end content workflows.
- Developed using Next.js, Supabase, and Clerk with Stripe billing and mobile-optimized dashboard.

InvestIQ

my-investiq.vercel.app

- Built Invest-IQ, an AI platform offering personalized investment recommendations and financial planning.
- Integrated Gemini AI and Gold API for real-time tracking and 5+ interactive financial calculators.
- Created a goal-based profiling system to assess user risk tolerance and generate personalized investment strategies.
- Developed with React 19 and Appwrite to manage user accounts, save financial data, and show interactive charts.

EDUCATION

Maharishi Dayanand University, Rohtak

2022 – 2026

Bachelor of Technology, Computer Science Engineering

Percentage: 75%
